Uploading Project [pg 8-9](#)

TECHNIQUE 1

Wiggle Animation

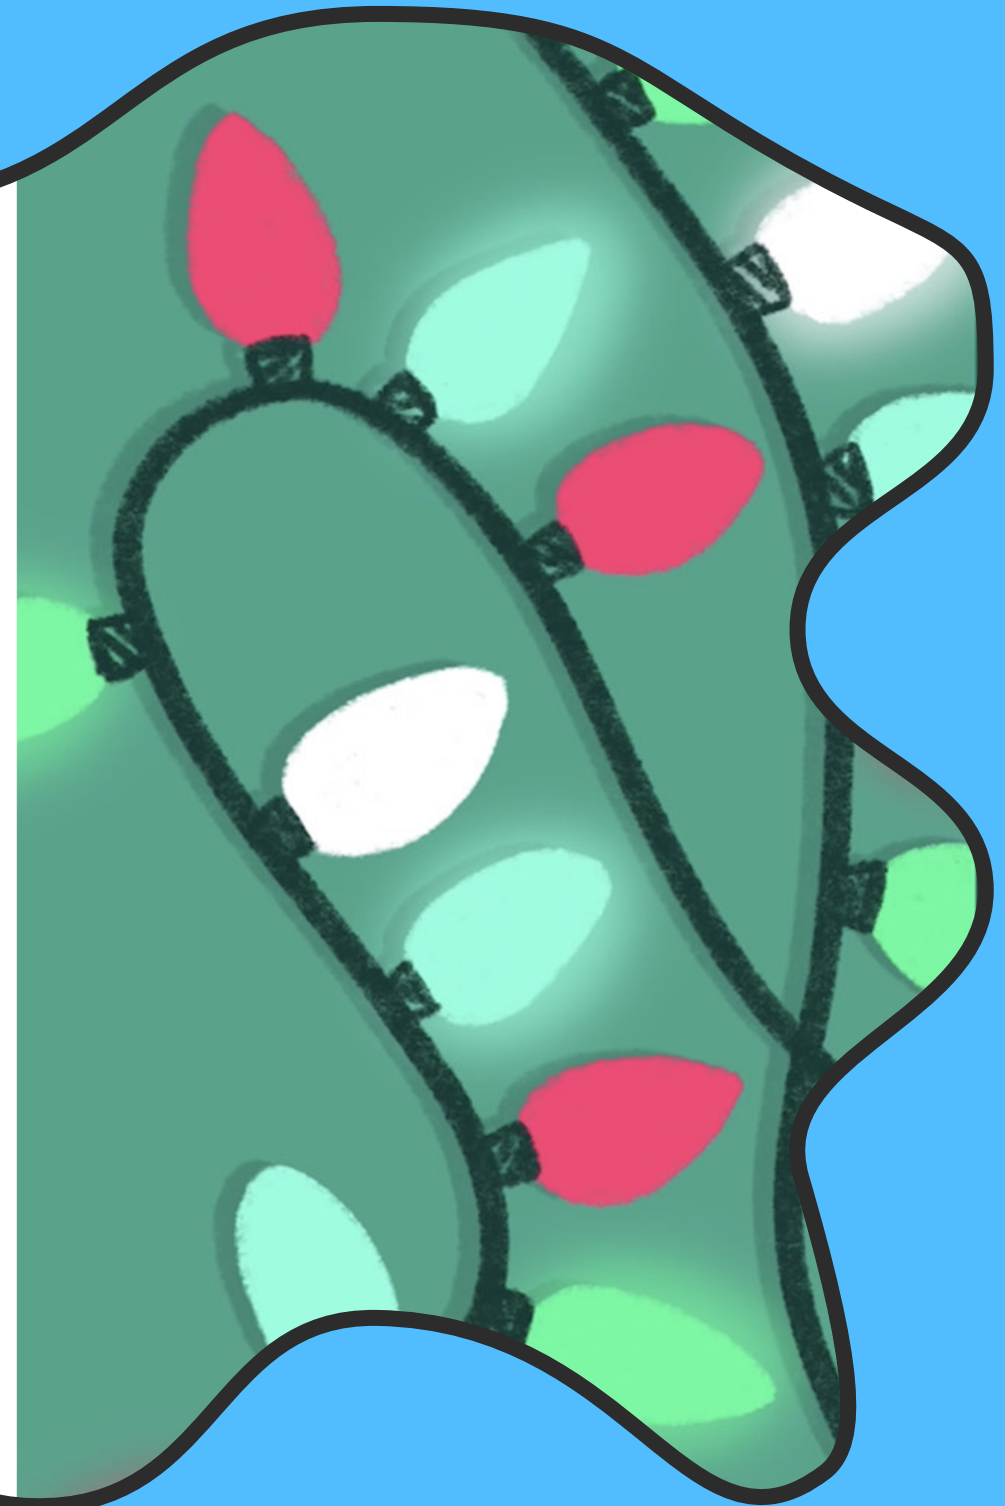

To create a looping **WIGGLE** animation
you just need to **TRACE** a drawing or lettering **2X**

TECHNIQUE 2

Glowing Lights

Is created by drawing around a light source and then using Gaussian blur paired with lowered opacity to create a soft glow and then adjusting the transparency so it glows or blinks.

TECHNIQUE 3

Snow Effect

Creating a simple snow fall effect, is created very similarly to the animated greeting, where you will draw the snow texture over your illustration 3x. And the variation in each drawing will create a falling snow effect.

Class Project Steps

- 1. Select an illustration**
- 2. Plan out your animation**
- 3. Set up your file**
- 4. Add 1 or more techniques to your illustration**
- 5. Export animation as a video or a gif**

Animation Idea Starters

Not sure what to animate? Here's some thought starters.

- **Animated Text Greeting**
- **Blinking Holiday Lights**
- **A wiggly Christmas Tree**
- **Winter Scene**
- **Snow Globe**
