

Mastering Illustrator Tools & Techniques for Creating Geometric Grid-Based Designs

TABLE OF CONTENTS

Introduction & Class Overview

Your Class Project & Contest

UNIT 1: GRIDS AS A CREATIVE INSTRUMENT

Part 1.1: Understanding Geometric Grids

UNIT 2: SETTING UP ILLUSTRATOR FOR EFFICIENT WORKFLOW

Part 2.1: Illustrator Document Setup

00:46 — Setting up a New Document

Part 2.2: Illustrator Preferences, Workspace & View Settings

00:37 — Illustrator Preferences

03:07 — View Options

04:54 — Workspace Setup

07:26 — Saving Your Workspace as a Preset

Part 3.1: Creating Standard Grids: Introduction

01:01 — Types of Standard Grids

Part 3.2: Creating Regular Rectangular & Square Grids

00:29 — Creating a Rectangle Which Will Contain Your Grid

02:33 — Splitting Your Rectangle into a Grid

Part 3.3: Creating Irregular Rectangular Grids

00:47 — Drawing Irregular Rectangular Grids with the Rectangular Grid Tool

02:35 — Numeric Setup of Irregular Rectangular Grids

Part 3.4: Creating Regular & Irregular Polar Grids

00:47 — Drawing Polar Grids with the Polar Grid Tool

02:38 — Numeric Setup of Polar Grids

05:38 — Adjusting Radial Dividers

07:07 — Trimming Radial Dividers

Part 3.5: Creating Isometric & Hexagonal Grids

01:05 — Constructing an Isometric Grid

03:58 — Adjusting the Height of Your Isometric Grid

05:45 — Trimming Redundant Paths

06:52 — Adjusting Your Artboard to Match the Size of the Grid

08:05 — Creating a Hexagonal Grid from an Isometric Grid

Part 3.6: Combining Standard Grids

00:50 — Copying Artboards with Your Grids

02:12 — Approaches to Combining Standard Grids

03:32 — Tip #1: Use a Separate Layer for Each Grid

03:55 — Tip #2: Create a Second Grid on Top of an Existing Grid

04:14 — Tip #3: Experiment with Drawing Polar & Rectangular Grids from Their Centres & Corners

04:52 — Tip #4: Trim Grid Elements Which Fall Outside Your Artboards

05:19 — Tip #5: Explore Different Compositions Using the Same Grids or Their Multiple Copies

05:47 — Tip #6: Use Consistent Round Numbers for Numeric Grid Setup

06:36 — Tip #7: Create Oversized Grids for Easy Calculation

07:16 — Tip #8: Creating a Square Grid Rotated on a 45° Angle Which Matches Other Grids

08:50 — Tip #9: Don't Overcomplicate Your Grids

09:47 — Sorting out Your Grid Layers

Part 4.1: Creating Custom Grids: Design Considerations

- 01:38 — Format Use
- 02:05 — Repeatability & Edges
- 02:37 — Spacing & Arrangement of Elements
- 03:12 — Symmetry & Balance
- 03:33 — Emphasis
- 03:54 — Movement & Direction
- 04:30 — Scale & Proportions

Part 4.2: Adding Custom Linear Elements to Your Grids

- 01:14 — Adding Linear Elements with the Line Segment Tool
- 03:18 — Adding Linear Elements with the Pen Tool
- 04:34 — Adding Linear Elements with the Arc Tool

Part 4.3: Tips & Tricks for Creating Geometric Shapes for Your Grids

- 00:37 — Numeric Setup vs Drawing Shapes on Top of a Standard Grid
- 02:51 — Changing the Number of Sides & Points in Polygons & Stars
- 03:13 — Constraining Proportions & Straightening Shapes Along X & Y Axes
- 03:30 — Drawing Rectangles & Ellipses from Their Centres
- 04:02 — Creating Regular Stars
- 04:37 — Locking the Inner Radius & Manually Changing the Outer Radius of Stars
- 05:18 — Accurately Position Shapes Using Smart Guides
- 05:56 — Deleting Points or Segments Using the Direct Selection Tool
- 06:27 — Repositioning Anchor Points for Snapping Shapes

Part 4.4: Modifying Shapes Using the Live Shape Properties

- 00:34 — Shape Properties of Ellipses
- 01:07 — Shape Properties of Rectangles
- 01:42 — Shape Properties of Polygons
- 02:25 — Converting Paths into Shapes

Part 4.5: Creating Custom Shapes Using Pathfinder

- 01:01 — Shape Modes
- 01:50 — Pathfinder Divide

Part 4.6: Composing Grid Elements with the Transform Tools

- 00:53 — Creating Grids with Linear Repetition of Elements
- 01:43 — Creating Grids with Rotational Repetition of Elements
- 03:31 — Creating Grids with Elements Gradually Changing in Size
- 05:00 — Creating Experimental Compositions by Shearing Grid Elements

Part 4.7: Repeating & Transforming Grid Elements with the Blend Tool

- 00:34 — Creating & Adjusting Blends Using the Blend Options
- 02:45 — Creating New Compositions by Modifying Objects Forming the Blend
- 03:51 — Changing Settings of an Existing Blend
- 04:17 — Creating Blends Between Open Paths
- 06:29 — Changing the Blend's Trajectory
- 07:28 — Expanding Your Blends

Part 5.1: Design Considerations & Approaches to Creating Grid-Based Designs

- 01:50 — Shape-Based vs Linear Designs
- 03:52 — Design Considerations
- 04:22 — Symmetry vs Asymmetry
- 04:37 — Format Use
- 04:56 — Repetition
- 05:28 — Movement
- 05:42 — Rhythm
- 05:58 — Focal Point

Part 5.2: Preparing Your Grids for Creating Shape-Based Designs

- 00:57 — Saving a Master File with All Grids & Preparing a Document for Your Design
- 01:43 — Dividing Your Grid into Modules

Part 5.3: Developing Shape-Based Designs Using the Live Paint Bucket Tool

- 00:22 — Setting up the Live Paint Bucket Tool
- 01:13 — Using the Live Paint Bucket Tool to Develop Shape-Based Designs

Part 5.4: Combining Grid Modules into Larger Shapes

- 00:51 — Tips for Manually Selecting Modules Which You Want to Unite
- 03:15 — Uniting Selected Modules into Larger Shapes
- 03:57 — Selecting & Uniting All Modules Coloured in the Same Colour
- 05:08 — Combining Manual & Automatic Selection Techniques for Better Workflow

Part 5.5: Creating Shape-Based Designs Using the Shape Builder Tool

- 00:36 — Setting up the Shape Builder Tool
- 02:12 — Using the Shape Builder Tool to Merge & Colour Shapes
- 04:05 — Using the Shape Builder Tool in Outline Mode

Part 5.6: Tips & Tricks for Creating Linear Designs

- 00:36 — Converting Your Grid into Guides
- 03:02 — Creating Linear Designs Using the Pen Tool
- 03:46 — Sourcing Curved Elements from the Original Grid
- 04:08 — Joining Open Paths
- 04:43 — Using Elements from Your Custom Grid
- 05:09 — Creating Linear Designs Using the Pathfinder Outline & Shape Builder Tool
- 06:14 — Cutting Paths at Anchor Points
- 07:05 — Colouring Strokes Using the Live Paint Bucket Tool
- 08:19 — Trimming Paths
- 08:51 — Using Caps & Corners Options to Neaten up Stroke-Based Designs
- 09:47 — Developing Linear Designs Using the Stroke Settings
- 11:07 — Arranging Paths in Your Designs

UNIT 6: FINALISING COLOURS

Part 6.1: Tips & Techniques for Colouring Your Designs

- 01:30** — Loading Colour Swatches & Arranging Them into Groups
- 03:02** — Converting Swatches into Global Colours
- 03:47** — Getting Started with the Recolour Artwork Tool
- 04:54** — Recolour Artwork Tool: Colour Reduction Options
- 06:16** — Using the Recolour Artwork Tool in the Assign Mode
- 07:11** — Editing Colours Using the Colour Wheel
- 08:35** — Adjusting Global Colours

UNIT 7: STYLING GEOMETRIC DESIGNS

Part 7.1: Styling Geometric Designs: Introduction

Part 7.2: Styling Your Designs Using Strokes

- 00:30** — Tips & Tricks for Adding Stroke to All Shapes in Your Design
- 03:50** — Ideas for Layering Strokes Over Shape-Based Designs

Part 7.3: Creating Gaps Between Shapes by Offsetting Paths

- 00:40** — Applying the Offset Path Effect
- 02:35** — Expanding the Offset Path Effect
- 03:27** — Adding a Background Behind Offset Paths
- 04:00** — Using Your Design as a Mask

Part 7.4: Customising Your Designs Using Live Corners

- 00:44** — Modifying Shapes Using Live Corners
- 01:41** — Changing Corner Style
- 02:29** — Corner Radius Restrictions
- 03:19** — Adding an Overall Background to Fill the Gaps

Part 7.5: Texturing Your Designs Using Patterns

- 01:21** — Creating a Dot Pattern
- 03:09** — Copying Shapes & Applying Pattern Swatches
- 04:27** — Transforming Patterns Within the Shapes
- 06:25** — Reusing Transformation Attributes

UNIT 8: FINALISING YOUR GEOMETRIC DESIGNS

Part 7.5: Texturing Your Designs Using Patterns

- 01:21** — Creating a Dot Pattern
- 03:09** — Copying Shapes & Applying Pattern Swatches
- 04:27** — Transforming Patterns Within the Shapes
- 06:25** — Reusing Transformation Attributes

Part 7.6: Styling Your Designs Using Repeating Linear Elements

- 01:12** — Preparing Straight or Angular Sides for Direct Blending
- 02:07** — Preparing Curved or Complex Sides for Direct Blending
- 03:05** — Adjusting Stroke Settings & Creating Direct Blends
- 04:26** — Preparing a Custom Spine & Creating a Blend Along It
- 06:23** — Troubleshooting & Adjusting Blends Along Custom Spines
- 08:25** — Putting Your Blends into Clipping Masks
- 09:36** — Customising Blends Using Stroke Settings
- 10:32** — Expanding Blends & Further Development
- 12:44** — Outlining Strokes & Cropping Paths

Part 7.7: Developing Your Designs Using Gradients

- 01:04** — Using Fill Gradients
- 04:00** — Using Stroke Gradients
- 06:12** — Shading with Gradients

Part 8.1: Troubleshooting & Preparing Your Work for Output

- 00:15** — Adjusting the Size of Your Design & Artboard to Make Them Pixel Perfect
- 01:48** — Fixing Issues & Removing Defects
- 02:33** — Joining Open Paths to Create Perfect Corners
- 02:53** — Uniting Adjacent Shapes Sharing the Same Fill Colour
- 03:34** — Removing Unnecessary Anchor Points

UNIT 9: USING GEOMETRIC DESIGNS TO CREATE SURFACE PATTERNS

Part 9.1: Tips & Ideas for Tiling Geometric Designs

- 00:17** — Creating Basic Pattern Swatches
- 00:52** — Creating Different Tile Arrangements with the Pattern Options Tool
- 02:14** — Manual Pattern Arrangement: Moving, Rotating & Reflecting Tiles
- 03:05** — Manual Pattern Arrangement: Offsetting Tiles

UNIT 10: EXPORTING YOUR DESIGNS

Part 10.1: Saving Your Work for Web & Print

- 00:23** — Exporting Your Work in JPG & PNG Formats in RGB Colour Mode
- 02:45** — Converting Your Work into CMYK & Exporting It in TIFF Format for Printing

Final Thoughts & Conclusion
